## LETTER OF RECOMMENDATION

It gratifies me to give this letter of recommendation to **Ms. Sai Keerthana Todupunoori** who is keen to pursue her higher studies at your university. She has immense potential and motivation for graduate studies and is a student of high moral and ethical standards. During her course work in Computer Science Engineering, I had the opportunity to closely interact with her for over a period of two semesters and I have even taught her “**Machine Learning**”. Her good character and profound knowledge has developed a good rapport with all the faculty members and with all her peers

Her dedication towards work, studies, mastery over fundamentals and ability to extract and integrate information impressed me. She is a brilliant student with a good academic record in her class. She can grasp the things very quickly and has good analytical and reasoning skills, these made her a very good problem solver and smart coder. Sai Keerthana is a sincere and hard-working student with unparalleled self-drive to excel in her chosen field of studies. She has been consistent in her academic performance throughout her undergraduate program. Her interest in learning the basic concepts and researching about it further is reflected in her scores.

In her practical studies, she showed a lot of innovation and eagerness. She worked very hard and spent extra hours at the college laboratories to obtain accurate results in all the experiments. I find her very attentive in the class. She understands the importance of the lectures and makes sure that all the topics are understood from scratch at the classroom only

With all the needed intellectual paraphernalia, innovation, skills, and assets, I feel she is one of the best all-around students and recommend her as a candidature for admission, which lends an opportunity to prove herself at your University. For any further response about Sai Keerthana, I will be available on the above details provided.
