

TO WHOM IT MAY CONCERN

It gives me immense pleasure to recommend **Ms. Sai Keerthana Todupunoori** for her master's program at your renowned university. As a Chief Executive Officer at RentEra(Qtenent Technologies private limited) The company, I first met her as an Intern for the Android Mobile Application Development course. During this time, I noticed that she continues to have a solid grasp of the concepts.

Sai Keerthana was hired as an intern for the role of developing Android applications, and she rapidly grasped and completed all of the responsibilities given to her. During her internship, she gained experience using Android Studio to design and build applications. She has developed a strong foundation in creating applications from scratch. She also worked on a personal project that had a defined goal.

At the end of the internship, the project was examined under my supervision, and I was able to acknowledge her excellent communication abilities while presenting the project. I observed her depth of knowledge and technical clarity as well. As the project's team leader, she consistently provided direction to her teammates. Her team used the Android Studio tool to create a "MedDocs Android application". In my knowledge of this field, I believe it to be one of the most creative concepts.

As a result, I firmly believe that she will excel at your university and in her career as a whole. I highly recommend her to engage in her desired course at your esteemed university. Contact me at any time if you have any further questions.

Sincerely,

Mohammed Rahil Azeez

CEO, Director (Qtenent Technologies Pvt.Ltd)
