LETTER OF RECOMMENDATION

I am writing this letter to recommend **Ms. Sai Keerthana Todupunoori** for her master's program at your renowned organisation. I have taught her the course titled 'Finite Automata and Formal Language' in the fifth semester, which has given me an opportunity to assess her commitment and interest towards her studies. Also, I have known her in the capacity of being Project Guide and acquainted with her for a good period, during which she has proven to be diligent and adroit at performing research in her domain.

Sai Keerthana is an exceptionally talented individual with a plethora of skills that set her apart from her peers. She is a meritorious student who always stood first in her class and remained consistent in her performance of learning in both academic and non-academic areas. She and her team have been working on the project "Andro Doctor - an android application". She led the team with great energy, confidence, and sincerity. I can see her to become well versed for which she is leaving no stone unturned.

Moreover, she is an eloquent speaker with the ability to express her ideas in a lucid and logical manner. Her approach is methodical and conscientious. She is not afraid to ask for clarification, which aids her grasp of the reasoning and concepts. In fact, several of her questions prompted me to ponder, which aided my learning.

Overall, she has a very strong sense of community and teamwork, with an evident passion for the field of computer science. She has demonstrated great leadership skills and proved herself to be a worthwhile student of our department. I am confident that she will be an asset to whichever institution she attends and will accomplish the course with high honours. Thus, I wholeheartedly recommend her to your esteemed institution.
